Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The amendment filed July 22, 2002 has been entered and made of record as paper no. 7.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claims 2 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, "the power semiconductor switching device" has no antecedent basis.

In claim 13, "the power semiconductor device" has no antecedent basis.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burstein et al (US-6,278,264, cited by Applicants).

Burstein discloses an integrated circuit assembly comprising a flip chip (16) having a plurality of field effect transistors and a package (44) connected to the field effect transistors formed in the flip chip. Note line 7 of column 1 and lines 37-40 of column 2 of Burstein. Since the transistors are used to form power transistors, it would have been obvious to one of ordinary skill in the art that the power transistors can

conduct current exceeding one Amperes. The solder bumps 56 in Burstein's device is obviously connected to the sources and drains of the power transistor in order to connect the current to the printed circuit board 46.

In re claims 2-16 and 18-34, figures 3A-8G discloses all of the connections between the field effect transistor and the printed circuit board.

The other reference is cited to show other structure pertinent to Applicants' disclosure.
